The Making of the English Working Class- Edward Palmer Thompson 1963

The Making of the English Working Class-E. P. Thompson 2016-03-15 A history of the common people and the Industrial Revolution: "A true masterpiece" and one of the Modern Library's 100 Best Nonfiction Books of the twentieth century (Tribune). During the formative years of the Industrial Revolution, English workers and artisans claimed a place in society that would shape the following centuries. But the capitalist elite did not form the working class—the workers shaped their own creations, developing a shared identity in the process. Despite their lack of power and the indignity forced upon them by the upper classes, the working class emerged as England's greatest cultural and political force. Crucial to contemporary trends in all aspects of society, at the turn of the nineteenth century, these workers united into the class that we recognize all across the Western world today. E. P. Thompson's magnum opus, *The Making of the English Working Class* defined early twentieth-century English social and economic history, leading many to consider him Britain's greatest postwar historian. Its publication in 1963 was highly controversial in academia, but the work has become a seminal text on the history of the working class. It remains incredibly relevant to the social and economic issues of current times, with the Guardian saying upon the book's fiftieth

anniversary that it "continues to delight and inspire new readers."

Histories of a Radical Book-Antoinette Burton 2020-11-01 For better or worse, E.P. Thompson's monumental book *The Making of the English Working Class* has played an essential role in shaping the intellectual lives of generations of readers since its original publication in 1963. This collected volume explores the complex impact of Thompson's book, both as an intellectual project and material object, relating it to the social and cultural history of the book form itself—an enduring artifact of English history.

The Making of the English Working Class- Edward Palmer Thompson 1978

The Making of English Popular Culture-John Storey 2016-05-20 *The Making of English Popular Culture* provides an account of the making of popular culture in the nineteenth century. While a form of what we might describe as popular culture existed before this period, John Storey has assembled a collection that demonstrates how what we now think of as popular culture first emerged as a result of the enormous changes that accompanied the industrial revolution. Particularly significant are the technological changes that made the production of new forms of culture possible and the concentration of people in urban areas that created significant audiences for this new

culture. Consisting of fourteen original chapters that cover diverse topics ranging from seaside holidays and the invention of Christmas tradition, to advertising, music and popular fiction, the collection aims to enhance our understanding of the relationship between culture and power, as explored through areas such as 'race', ethnicity, class, sexuality and gender. It also aims to encourage within cultural studies a renewed historical sense when engaging critically with popular culture by exploring the historical conditions surrounding the existence of popular texts and practices. Written in a highly accessible style *The Making of English Popular Culture* is an ideal text for undergraduates studying cultural and media studies, literary studies, cultural history and visual culture.

The Making of English National Identity-

Krishan Kumar 2003-03-13 Why is English national identity so enigmatic and so elusive? Why, unlike the Scots, Welsh, Irish and most of continental Europe, do the English find it so difficult to say who they are? *The Making of English National Identity*, first published in 2003, is a fascinating exploration of Englishness and what it means to be English. Drawing on historical, sociological and literary theory, Krishan Kumar examines the rise of English nationalism and issues of race and ethnicity from earliest times to the present day. He argues that the long history of the English as an imperial people has, as with other imperial people like the Russians and the Austrians, developed a sense of missionary nationalism which in the interests of unity and empire has necessitated the repression of ordinary expressions of nationalism. Professor Kumar's lively and provocative approach challenges readers to reconsider their pre-conceptions about national identity and who the English really are.

The Making of Chaucer's English-Christopher Cannon 1998 A substantial reappraisal of the place of Chaucer's English in the history of English language and literature.

The Making of the English Middle Class-

Peter Earle 1989-01-01 This is the first major study of a neglected yet extremely significant subject: the London middle classes in the period between 1660 and 1730, a period in which they created a society and economy that can be seen

with hindsight to have ushered in the modern world. Using a wealth of material from contemporary sources--including wills, business papers, inventories, marriage contracts, divorce hearings, and the writings of Daniel Defoe and Samuel Pepys--Peter Earle presents a fully rounded picture of the "middling sort of people," getting to the hearts of their lives as men and women struggling for success in the biggest, richest, and most middle-class city in contemporary Europe. He examines in fascinating and convincing detail the business life of Londoners, from apprenticeship through the problems and potential rewards of different occupational groups, going on to look at middle-class family, social, political and material life--from relationships with spouses, children, servants, and neighbors, to food and clothes and furniture, to sickness, death, and burial. Stimulating, scholarly, and constantly illuminating, this book is an important and impressive contribution to English social history.

A Sweet View-Malcolm Andrews 2021-11-11

From country lanes to thatch roofs, a stroll through the enduring appeal of the nineteenth-century trope of rural English bliss. *A Sweet View* explores how writers and artists in the nineteenth century shaped the English countryside as a partly imaginary idyll, with its distinctive repertoire of idealized scenery: the village green, the old country churchyard, hedgerows and cottages, scenic variety concentrated into a small compass, snugness and comfort. The book draws on a very wide range of contemporary sources and features some of the key makers of the "South Country" rural idyll, including Samuel Palmer, Myles Birket Foster, and Richard Jefferies. The legacy of the idyll still influences popular perceptions of the essential character of a certain kind of English landscape--indeed for Henry James that imagery constituted "the very essence of England" itself. As *A Sweet View* makes clear, the countryside idyll forged over a century ago is still with us today.

The Making of the English Landscape-W. G.

Hoskins 2013 An original and influential history of the English landscape.

The Making of the Oxford English

Dictionary-Peter Gilliver 2016-09-22 This book

tells the history of the Oxford English Dictionary from its beginnings in the middle of the nineteenth century to the present. The author, uniquely among historians of the OED, is also a practising lexicographer with nearly thirty years' experience of working on the Dictionary. He has drawn on a wide range of sources-including previously unexamined archival material and eyewitness testimony-to create a detailed history of the project. The book explores the cultural background from which the idea of a comprehensive historical dictionary of English emerged, the lengthy struggles to bring this concept to fruition, and the development of the book from the appearance of the first printed fascicle in 1884 to the launching of the Dictionary as an online database in 2000 and beyond. It also examines the evolution of the lexicographers' working methods, and provides much information about the people-many of them remarkable individuals-who have contributed to the project over the last century and a half.

The Making of Modern English Society from 1850

Janet Roebuck 1982 In the second half of the nineteenth century and the first half of the twentieth century a variety of forces emerged which changed society in many profound and subtle ways. *The Making of Modern English Society from 1850* uses the findings of recent historical and sociological research contemporary literature, and a wide range of historical sources to form a clear picture of the main patterns of the social changes which took place in this turbulent period. Jane Roebuck shows how in these hundred years the whole fabric of society altered more rapidly and radically than in any preceding century. She gives an account of the dramatic change which occurred in all spheres of national life. She demonstrates how the drift towards socialism, which began in the nineteenth century, gathered momentum in the twentieth and how massive social change was produced by the two world wars. In the field of economics, the author considers the development of the maturing but still primitive industrial economy of the mid-nineteenth century into a modern economy based on mass production and mass consumption. She also describes the change in emphasis from desire for world power to concern for domestic prosperity and welfare services.

Making Meaning in English-David Didau

2021-02-10 What is English as a school subject for? What does knowledge look like in English and what should be taught? *Making Meaning in English* examines the broader purpose and reasons for teaching English and explores what knowledge looks like in a subject concerned with judgement, interpretation and value. David Didau argues that the content of English is best explored through distinct disciplinary lenses – metaphor, story, argument, pattern, grammar and context – and considers the knowledge that needs to be explicitly taught so students can recognise, transfer, build and extend their knowledge of English. He discusses the principles and tools we can use to make decisions about what to teach and offers a curriculum framework that draws these strands together to allow students to make sense of the knowledge they encounter. If students are going to enjoy English as a subject and do well in it, they not only need to be knowledgeable, but understand how to use their knowledge to create meaning. This insightful text offers a practical way for teachers to construct a curriculum in which the mastery of English can be planned, taught and assessed.

The Making of the English Gardener

Margaret Willes 2011-11-29 In the century between the accession of Elizabeth I and the restoration of Charles II, a horticultural revolution took place in England, making it a leading player in the European horticultural game. Ideas were exchanged across networks of gardeners, botanists, scholars, and courtiers, and the burgeoning vernacular book trade spread this new knowledge still further-reaching even the growing number of gardeners furnishing their more modest plots across the verdant nation and its young colonies in the Americas. Margaret Willes introduces a plethora of garden enthusiasts, from the renowned to the legions of anonymous workers who created and tended the great estates. Packed with illustrations from the herbals, design treatises, and practical manuals that inspired these men--and occasionally women--Willes's book enthrallingly charts how England's garden grew.

The Making of English-Henry Bradley 1904

The Making of Middle English, 1765-1910-David Matthews 1999 Before the 1760s -- with the major exception of Chaucer -- nearly all of Middle English literature lay undiscovered and ignored. Because established scholars regarded later medieval literature as primitive and barbaric, the study of this rich literary heritage was relegated to antiquarians and dilettantes. In *The Making of Middle English, 1765-1910*, David Matthews chronicles the gradual rediscovery of this literature and the formation of Middle English as a scholarly pursuit. Matthews details how the careers, class positions, and ambitions of only a few men gave shape and direction to the discipline. Mostly from the lower middle class, they worked in the church or in law and hoped to exploit medieval literature for financial success and social advancement. Where Middle English was concerned, Matthews notes, these scholars were self-taught, and their amateurism came at the price of inaccurately edited and often deliberately "improved" texts intended for a general public that sought appealing, rather than authentic, reading material. This study emphasizes the material history of the discipline, examining individual books and analyzing introductions, notes, glossaries, promotional materials, lists of subscribers, and owners' annotations to assess the changing methodological approaches of the scholars and the shifts in readership. Matthews explores the influence of aristocratic patronage and the societies formed to further the editing and publication of texts. And he examines the ideological uses of Middle English and the often contentious debates between these scholars and organizations about the definition of Englishness itself. A thorough work of scholarship, *The Making of Middle English* presents for the first time a detailed account of the formative phase of Middle English studies and provides new

perspectives on the emergence of medieval studies, canon formation, the politics of editing, and the history of the book.

Saracens and the Making of English

Identity-Siobhain Bly Calkin 2013-11-05 This book explores the ways in which discourses of religious, racial, and national identity blur and engage each other in the medieval West. Specifically, the book studies depictions of Muslims in England during the 1330s and argues that these depictions, although historically inaccurate, served to enhance and advance assertions of English national identity at this time. The book examines Saracen characters in a manuscript renowned for the variety of its texts, and discusses hagiographic legends, elaborations of chronicle entries, and popular romances about Charlemagne, Arthur, and various English knights. In these texts, Saracens engage issues such as the demarcation of communal borders, the place of gender norms and religion in communities' self-definitions, and the roles of violence and history in assertions of group identity. Texts involving Saracens thus serve both to assert an English identity, and to explore the challenges involved in making such an assertion in the early fourteenth century when the English language was regaining its cultural prestige, when the English people were increasingly at odds with their French cousins, and when English, Welsh, and Scottish sovereignty were pressing matters.

Making Sense of "Bad English"-Elizabeth Peterson 2019-10-17 Why is it that some ways of using English are considered "good" and others are considered "bad"? Why are certain forms of language termed elegant, eloquent or refined, whereas others are deemed uneducated, coarse, or inappropriate? *Making Sense of "Bad English"* is an accessible introduction to attitudes and ideologies towards the use of English in different settings around the world. Outlining how perceptions about what constitutes "good" and "bad" English have been shaped, this book shows how these principles are based on social factors rather than linguistic issues and highlights some of the real-life consequences of these perceptions. Features include: an overview of attitudes towards English and how they came about, as well as real-life consequences and benefits of using "bad" English; explicit links between different English language systems,

including child's English, English as a lingua franca, African American English, Singlish, and New Delhi English; examples taken from classic names in the field of sociolinguistics, including Labov, Trudgill, Baugh, and Lambert, as well as rising stars and more recent cutting-edge research; links to relevant social parallels, including cultural outputs such as holiday myths, to help readers engage in a new way with the notion of Standard English; supporting online material for students which features worksheets, links to audio and news files, further examples and discussion questions, and background on key issues from the book. Making Sense of "Bad English" provides an engaging and thought-provoking overview of this topic and is essential reading for any student studying sociolinguistics within a global setting.

The Making of the Modern English State,

1460-1660-Philip Edwards 2017-05-01

1460-1660 was a dramatic and crucially formative period in the emergence of the modern English state, language and identity. It encompassed the reigns of the last Plantagenets, the Tudors and the early Stuarts, as well as the victory of Parliament over the King in the Great Civil War and the amazing experiment of the Puritan Republic. The Making of the Modern English State traces the changes in politics and religion over the two hundred years that helped to form a new English identity. It is both an up-to-date narrative of the growth of the English state and an invaluable guide to recent historiography.

The Making of the English Village-Brian K.

Roberts 1987

Making Ireland English-Jane Ohlmeyer

2012-06-26 This groundbreaking book provides the first comprehensive study of the remaking of Ireland's aristocracy during the seventeenth century. It is a study of the Irish peerage and its role in the establishment of English control over Ireland. Jane Ohlmeyer's research in the archives of the era yields a major new understanding of early Irish and British elite, and it offers fresh perspectives on the experiences of the Irish, English, and Scottish lords in wider British and continental contexts. The book examines the resident peerage as an aggregate of 91 families, not simply 311 individuals, and demonstrates how a reconstituted peerage of mixed faith and ethnicity assimilated the established Catholic aristocracy. Tracking the impact of colonization, civil war, and other significant factors on the fortunes of the peerage in Ireland, Ohlmeyer arrives at a fresh assessment of the key accomplishment of the new Irish elite: making Ireland English.

The Enlightenment-Ritchie Robertson

2021-02-23 A magisterial history that recasts the Enlightenment as a period not solely consumed with rationale and reason, but rather as a pursuit of practical means to achieve greater human happiness. One of the formative periods of European and world history, the Enlightenment is the fountainhead of modern secular Western values: religious tolerance, freedom of thought, speech and the press, of rationality and evidence-based argument. Yet why, over three hundred years after it began, is the Enlightenment so profoundly misunderstood as controversial, the expression of soulless calculation? The answer may be that, to an extraordinary extent, we have accepted the account of the Enlightenment given by its conservative enemies: that enlightenment necessarily implied hostility to religion or support for an unfettered free market, or that this was "the best of all possible worlds". Ritchie Robertson goes back into the "long eighteenth century," from approximately 1680 to 1790, to reveal what this much-debated period was really about. Robertson returns to the era's original texts to show that above all, the Enlightenment was really about increasing human happiness - in this world rather than the next - by promoting scientific inquiry and reasoned argument. In so doing Robertson chronicles the campaigns mounted by some Enlightened figures against evils like capital punishment, judicial torture, serfdom and witchcraft trials, featuring the experiences of major figures like Voltaire and

Diderot alongside ordinary people who lived through this extraordinary moment. In answering the question 'What is Enlightenment?' in 1784, Kant famously urged men and women above all to "have the courage to use your own intellect". Robertson shows how the thinkers of the Enlightenment did just that, seeking a well-rounded understanding of humanity in which reason was balanced with emotion and sensibility. Drawing on philosophy, theology, historiography and literature across the major western European languages, *The Enlightenment* is a master-class in big picture history about the foundational epoch of modern times.

Virginia 1619-Paul Musselwhite 2019-04-23
Virginia 1619 provides an opportunity to reflect on the origins of English colonialism around the Chesapeake Bay and the Atlantic world. As the essays here demonstrate, Anglo-Americans have been simultaneously experimenting with representative government and struggling with the corrosive legacy of racial thinking for more than four centuries. Virginia, contrary to popular stereotypes, was not the product of thoughtless, greedy, or impatient English colonists. Instead, the emergence of stable English Atlantic colonies reflected the deliberate efforts of an array of actors to establish new societies based on their ideas about commonwealth, commerce, and colonialism. Looking back from 2019, we can understand that what happened on the shores of the Chesapeake four hundred years ago was no accident. Slavery and freedom were born together as migrants and English officials figured out how to make this colony succeed. They did so in the face of rival ventures and while struggling to survive in a dangerous environment. Three hallmarks of English America--self-government, slavery, and native dispossession--took shape as everyone contested the future of empire along the James River in 1619. The contributors are Nicholas Canny, Misha Ewen, Andrew Fitzmaurice, Jack P. Greene, Paul D. Halliday, Alexander B. Haskell, James Horn, Michael J. Jarvis, Peter C. Mancall, Philip D. Morgan, Melissa N. Morris, Paul Musselwhite, James D. Rice, and Lauren Working.

Empire of Cotton-Sven Beckert 2015 "The epic story of the rise and fall of the empire of cotton, its centrality in the world economy, and its making and remaking of global capitalism. Sven Beckert's rich, fascinating book tells the story of

how, in a remarkably brief period, European entrepreneurs and powerful statesmen recast the world's most significant manufacturing industry combining imperial expansion and slave labor with new machines and wage workers to change the world. Here is the story of how, beginning well before the advent of machine production in 1780, these men created a potent innovation (Beckert calls it war capitalism, capitalism based on unrestrained actions of private individuals; the domination of masters over slaves, of colonial capitalists over indigenous inhabitants), and crucially affected the disparate realms of cotton that had existed for millennia. We see how this thing called war capitalism shaped the rise of cotton, and then was used as a lever to transform the world. The empire of cotton was, from the beginning, a fulcrum of constant global struggle between slaves and planters, merchants and statesmen, farmers and merchants, workers and factory owners. In this as in so many other ways, Beckert makes clear how these forces ushered in the modern world. The result is a book as unsettling and disturbing as it is enlightening: a book that brilliantly weaves together the story of cotton with how the present global world came to exist"--Résumé de l'éditeur.

Athelstan (Penguin Monarchs)-Tom Holland 2016-06-30 The formation of England occurred against the odds: an island divided into rival kingdoms, under savage assault from Viking hordes. But, after King Alfred ensured the survival of Wessex and his son Edward expanded it, his grandson Athelstan inherited the rule of both Mercia and Wessex, conquered Northumbria and was hailed as Rex totius Britanniae: 'King of the whole of Britain'. Tom Holland recounts this extraordinary story with relish and drama, transporting us back to a time of omens, raven harbingers and blood-red battlefields. As well as giving form to the figure of Athelstan - devout, shrewd, all too aware of the precarious nature of his power, especially in the north - he introduces the great figures of the age, including Alfred and his daughter Aethelflaed, 'Lady of the Mercians', who brought Athelstan up at the Mercian court. Making sense of the family rivalries and fractious conflicts of the Anglo-Saxon rulers, Holland shows us how a royal dynasty rescued their kingdom from near-oblivion and fashioned a nation that endures to this day.

The Making of the English Bible-Benson Bobrick 2001 In this account of the politics surrounding the translation of the Bible into vernacular languages Benson Bobrick shows that the achievement of Tyndale and other translators had a permanent influence on the English-speaking world.

Indian Ink-Miles Ogborn 2008-11-15 A commercial company established in 1600 to monopolize trade between England and the Far East, the East India Company grew to govern an Indian empire. Exploring the relationship between power and knowledge in European engagement with Asia, Indian Ink examines the Company at work and reveals how writing and print shaped authority on a global scale in the seventeenth and eighteenth centuries. Tracing the history of the Company from its first tentative trading voyages in the early seventeenth century to the foundation of an empire in Bengal in the late eighteenth century, Miles Ogborn takes readers into the scriptoria, ships, offices, print shops, coffeehouses, and palaces to investigate the forms of writing needed to exert power and extract profit in the mercantile and imperial worlds. Interpreting the making and use of a variety of forms of writing in script and print, Ogborn argues that material and political circumstances always undermined attempts at domination through the power of the written word. Navigating the juncture of imperial history and the history of the book, Indian Ink uncovers the intellectual and political legacies of early modern trade and empire and charts a new understanding of the geography of print culture.

The Making of the British Landscape-Nicholas Crane 2017-10-05 Nicholas Crane's new book brilliantly describes the evolution of Britain's countryside and cities. It is part journey, part history, and it concludes with awkward questions about the future of Britain's landscapes. Nick Crane's story begins with the melting tongues of glaciers and the emergence of a gigantic game-park tentatively being explored by a vanguard of Mesolithic adventurers who have taken the long, northward hike across the land bridge from the continent. The Iron Age develops into a pre-Roman 'Golden Era' and Crane looks at what the Romans did (and didn't) contribute to the British landscape. Major landscape 'events' (Black Death, enclosures, urbanisation, recreation, etc.) are fully described

and explored, and he weaves in the role played by geology in shaping our cities, industry and recreation, the effect of climate (and the Gulf Stream), and of global economics (the Lancashire valleys were formed by overseas markets). The co-presenter of BBC's COAST also covers the extraordinary benefits bestowed by a 6,000-mile coastline. The 12,000-year story of the British landscape culminates in the twenty-first century, which is set to be one of the most extreme centuries of change since the Ice Age.

The Making of the English Working Class, by E.P. Thompson ...-John Fletcher Clews Harrison 196?

The People-Selina Todd 2014-04-10 THE SUNDAY TIMES BESTSELLER 'There was nothing extraordinary about my childhood or background. And yet I looked in vain for any aspect of my family's story when I went to university to read history, and continued to search fruitlessly for it throughout the next decade. Eventually I realised I would have to write this history myself.' What was it really like to live through the twentieth century? In 1910 three-quarters of the population were working class, but their story has been ignored until now. Based on the first-person accounts of servants, factory workers, miners and housewives, award-winning historian Selina Todd reveals an unexpected Britain where cinema audiences shook their fists at footage of Winston Churchill, communities supported strikers, and where pool winners (like Viv Nicholson) refused to become respectable. Charting the rise of the working class, through two world wars to their fall in Thatcher's Britain and today, Todd tells their story for the first time, in their own words. Uncovering a huge hidden swathe of Britain's past, The People is the vivid history of a revolutionary century and the people who really made Britain great.

The Making of English Literature-William Henry Crawshaw 1907

Making History-Stephen Fry 2014-12-30 This "terrific" novel of alternate history asks: What if Hitler had never been born? (The Washington Post). Michael Young is a graduate student at Cambridge who is completing his dissertation on

the early life of Adolf Hitler. Leo Zuckermann is an aging German physicist haunted by the Holocaust. Together, they idealistically embark on an experiment to change the course of history. And with their success is launched a brave new world that is in some ways better than ours—but in most ways even worse.

The Condition of the Working-class in England in 1844-Friedrich Engels 1892

The Making of an Imperial Polity-Lauren Working 2019-12-31 This significant reassessment of Jacobean political culture reveals how colonizing America transformed English civility in early seventeenth-century England. This title is also available as Open Access.

The Age of Empire 1875-1914-E. J. Hobsbawm 1997-07-01

Industry and Empire-E J Hobsbawm 1999-04-29 This outstanding history describes and accounts for Britain's rise as the world's first industrial world power, its decline from the temporary dominance of the pioneer, its rather

special relationship with the rest of the world (notably the underdeveloped countries) and the effects of all these on the life of the British people.

Radical Sydney-Terry Irving 2010 Sydney: a beautiful international city with impressive buildings, harbour-side walkways, public gardens, cafes, restaurants, theatres and hotels. This is the way Sydney is represented to its citizens and to the rest of the world. But there has always been another Sydney not viewed so fondly by the city's rulers, a radical part of Sydney. The working-class suburbs to the south and west of the city were large and explosive places of marginalised ideas, bohemian neighbourhoods, dissident politics and contentious action. Through a series of snapshots, Radical Sydney traces its development from The Rocks in the 1830s to the inner suburbs of the 1980s. It includes a range of incidents, people and places, from freeing protestors in the anti-conscription movement, resident action movements in Kings Cross, anarchists in Glebe, to Gay Rights marches on Oxford Street and Black Power in Redfern.
